

Osama Al-Ghamdi

Jeddah, Saudi Arabia | +966 59 749 9473 | Osama.a.alghamdi707@gmail.com | linkedin:osama-alghamdi-51555a34b

Professional Summary

Senior Software Engineering student with experience in Android and web development using Java, React, and Firebase. Skilled in developing user-centered software systems, working in Agile and Scrum teams, and contributing throughout the software development lifecycle. Awarded first place in the Graduation Project in 3 Minutes Competition for presenting RepoCare and recognized with three Academic Excellence Awards. Interested in software engineering, artificial intelligence, research, and scientific publishing.

Education

University of Jeddah

Bachelor of Software Engineering | GPA: 4.61/5.00

Aug 2023 – Expected Graduation 2027

Jeddah, Saudi Arabia

Technical Skills

Programming Languages: Java, C#, Python, JavaScript, SQL

Mobile Development: Android Studio, Firebase Authentication, Firestore, Firebase Storage

Web Development: React, HTML, CSS, JavaScript, Firebase

Tools and Technologies: Git, GitHub, Figma, Unity, Jira, LaTeX

Software Engineering: Object-Oriented Programming, Agile, Scrum, Software Requirements, HCI, Technical Documentation

Projects

RepoCare – AI-Powered Healthcare Application

Java, Android, Firebase

- Developed an Android application for securely managing, organizing, and reviewing medical reports.
- Implemented Firebase Authentication, Firestore, and Cloud Storage for user profiles, report data, and uploaded files.
- Designed report-upload functionality supporting PDF and image files and planned AI-powered report interpretation.
- Awarded first place in the Graduation Project in 3 Minutes Competition for presenting the project.

AirQuest – Riyadh Air Global Hackathon

Hackathon Project

- Designed a gamified passenger engagement solution integrating AI, GPS, and AR concepts for Riyadh Air.
- Collaborated in a multidisciplinary team to develop and present a working prototype during the hackathon.
- Focused on enhancing customer engagement, airport navigation, and loyalty through personalized challenges and rewards.

ThinkUp – Collaborative Study Platform

React, Firebase, JavaScript

- Developed a collaborative web platform that enables university students to create and join study sessions.
- Built responsive interfaces using React and implemented authentication and real-time data management using Firebase.
- Designed features for session scheduling, participant management, study history, and AI-generated session summaries.

15 Min – 3D Escape Room Game

Unity, C#

- Developed a playable 3D escape room game featuring interactive puzzles, countdown logic, and an immersive environment.
- Released the first playable prototype during the Tuwaiq Academy Game Design and Development Program.

Research

VidSumEval: A Web Platform and Benchmark for Evaluating AI-Generated Programming Video Summaries ASE 2026

- Co-authored an accepted Tools and Datasets paper focused on evaluating AI-generated summaries of programming videos.
- Contributed to platform development, benchmark design, participant evaluation, and analysis of summary quality.

Experience

Student Developer

Mar 2025 – May 2025

University of Jeddah

Jeddah, Saudi Arabia

- Contributed to interface design, requirements analysis, project planning, documentation, and usability evaluation.
- Applied Agile practices and software engineering principles while collaborating in an academic development team.

Event Organizer

Oct 2022 – Dec 2022

Prestige Saudi Co. Ltd – Jeddah Season

Jeddah, Saudi Arabia

- Supported event operations, visitor communication, queue management, and crowd organization during peak periods.

Achievements and Certifications

- **First Place, Graduation Project in 3 Minutes Competition** – Presented RepoCare, an AI-powered healthcare application.
- **Accepted Paper, ASE 2026 Tools and Datasets Track** – VidSumEval.
- **Three-Time Academic Excellence Award Recipient** – University of Jeddah.
- **Game Design and Development Program** – Tuwaiq Academy.
