SUMMARY

Software Engineering student at the University of Jeddah with a passion for designing and developing software solutions. Interested in web development and user experience and interface design. Strong foundation in programming, problem-solving, and software development principles, with hands-on experience through academic and personal projects. Eager to continuously learn, collaborate, and contribute to real-world projects while building a successful career in software engineering.

EDUCATION

Bachelor of Software Engineering

University Of Jeddah

GPA: 4.99

03/2023 – Present

Jeddah, Saudi Arabia

PROJECTS

Kids Learning Quiz Application

2025

Developed an interactive Java educational application that helps children learn animals, fruits, and colors through image-based quizzes. Implemented score tracking, result saving, user-friendly navigation, and an engaging graphical interface (GUI) using Java Swing.

Tech Stack: Java, Object-Oriented Programming (OOP)

ARSHIDNI App

2025

Designed a prototype for an AI-powered mobile application that helps Jeddah University students access study resources, communicate with tutors, join interactive study groups, and gain benefit from the opinions of previous students.

Tech Stack: UI/UX, Figma

Storage Rental Management System

2026

Built a relational database for a storage rental service where customers can rent storage units for personal or commercial use. Designed the ER diagram, normalized the database, and implemented SQL queries for tables and relationships.

Tech Stack: SQL, Database Design (ERD), MySQL

CERTIFICATES

Project Management Fundamentals

From IBM

Code Generation and Optimization Using IBM

Granite

From IBM
