SUMMARY

Software Engineering student at the University of Jeddah Currently building expertise in JavaScript, HTML, CSS, React, and Tailwind CSS. I am particularly interested in designing reliable and maintainable software systems and exploring how artificial intelligence can be integrated into modern products.

SKILLS

- Languages: TypeScript, JavaScript, HTML, CSS
- Libraries: React.js
- Tools & Platforms: Git, GitHub, AWS Elastic Beanstalk

EDUCATION

University Of Jeddah

Bachelor of Software Engineering
2023 - present

PROJECTS EXPERINCE

Movie W Explorer

JavaScript, HTML, CSS (Grid/Flexbox), TMDb API, Day.js

- Developed a responsive movie search and exploration web app using vanilla JavaScript to fetch and process real-time data from the external TMDb API.
- Designed a mobile-first UI from scratch using CSS Grid, Flexbox, and media queries.

Weather Dashboard

JavaScript, HTML, CSS, WeatherAPI, Day.js,

- Developed an interactive weather dashboard web app that parses real-time, multi-day forecasting data from WeatherAPI using asynchronous JavaScript.
- Built custom data-parsing utilities to map raw API into streamlined local objects, isolating complex data logic from the UI rendering engine.
